SUBJECT INDEX TO VOLUME 36, 1990

[A]

*Aat*I, of *Acetobacter aceti* 273
acetic acid, production rate of 105
acetic acid production rate 221
Acetobacter aceti 105
Acetobacter aceti, *Aat*I of 273
Acetobacter aceti M23 221
Acetobacter pasteurianus, restriction endonuclease *Apa*ORI of 127
O-acetylhomoserine 137
Acinetobacter species 55
aflatoxins 59
alkalophile 7
amino acid composition 171
amino acid seuqence of head fiber 365
ammonium transport 303
ammnonium-nitrogen partitioning 171
Anabaena cylindrica 171
anaerobic respiratory enzymes 357
*Apa*ORI, restriction endonuclease of 127
archaebacterium 19
Arxula, partial rRNA sequences of 425
Aspergillus flavus 59
Aspergillus nidulans 137

[B]

Bacillus, new species 415
Bacillus stearothermophilus 189
Bacillus subtilis chromosome 179
Bacillus subtilis phage Nf 365
bacterial exopolymer production 93
ballistospore-forming yeast 33
biofertilizer-phosphate solubilizing bacteria 81
Bradyrhizobium 81
Bullera alba var. *lactis* 209
Bullera derxii 209
Bullera miyagiana sp. nov. 33
Bullera sinensis 209

[C]

Candida 151
cell bleeding 221
cell-recycle culture 221
cell yield 369
chemotaxonomic study 393
chitinase 377
chromate reduction 203
citric acid, stimulative effect on acetic acid production 105
classification, symbiotically nitrogen-fixing root nodule bacteria 47
Clostridium perfringens 333
co-culture 143
co-enzyme Q 151
co-existing fungi 59
conjugation 287
continuous culture 279
copper sulfate 235
cortex-lytic enzyme 333
Cryptococcus, partial rRNA sequences of 403
cyanobacteria 171
cyanobacterium 303
cytochrome spectra 151

[D]

dissolved oxygen, depletion of 105
DNA-DNA hydridization 1, 393
DNA homology, *Rhizobium* 47

[E]

electron donor 203
electrodialysis, separation of lactic acid by 111
electrophoresis 69
Enterobacter cloacae 203
enzyme-purification 377
Escherichia coli 235, 357
Escherichia coli chromosome 179
exoglucanase from *Aspergillus niger* 245
exopolysaccharides 215

[F]

Filobasidiella, partial rRNA sequences of 403
freeze-drying 283
freshwater 445

[G]

genertic relatedness, root nodule bacgeria 47
germination 333
glyceraldehyde 3-P dehydrogenase 19

growth 7

[H]

Haloarcula vallismortis 19
halophilic 19
head fiber protein gene 365
hexavalent chromium 203
high temperature L-lactate producer 1

[I]

identification of nocardioform bacteria ... 309
inorganic phosphate ions, loss in electrodialysis culture 111
interaction 59
integration host factor (IHF) 287
intracellular pH 7
intracellular surviving 143
iron-oxidizing bacteria 283
isolation of new thermophiles 415
isozyme patterns 69

[K]

K^+ transport 7
Kondoa malvinella, partial sequences of 18S and 26S rRNAs of 63

[L]

L-lactate homofermentative coccus 1
lactic acid, production rate of 111
Lactobacillus delbrueckii 111
Lactococcus lactis IO-1-, a new strain 1
Leucosporidium scottii, partial sequences of 18S and 26S rRNAs of 63
Listeria 143
long term stabilization 41
lytic enzyme 189

[M]

metal resistance 351
Microbacterium arborescens IFO 3750 255
Microbacterium imperiale IFO 12610 255
Microbacterium lacticum IFO 14135 255
Microbacterium laevaniformans IFO 14471 . 255
mithramycin A 451
Mycobacterium diernhoferi 195
mycoflora 295
mycolic acids of "*Protaminobacter alboflavus*" 195

[N]

Na^+/H^+ antiporter 7
nematode-associated bacteria 393
new peptide antibiotics-similar to nisin 1
nitrate reductase 357
nitrate respiration 235
Nocardia, *Rhodococcus*, *Gordona*, classification of 309
nocardioform bacteria, classification of 309
nuclear staining 451
numerical identification of nocardioform bacteria 309
numerical taxonomy of nocardioform bacteria 309
numerical taxonomy of "*Protaminobacter alboflavus*" 195

[O]

oriT 287

[P]

partial 18S and 26S rRNA sequences, of *Arxula*, *Stephanoascus* and *Yarrowia* 425
partial sequences of 18S and 26S rRNAs, of *Leucosporidium scottii* 63
partial 18S and 26S rRNA sequences, of *Phaffia*, *Cryptococcus* and *Filobasidiella* . 403
partial 18S and 26S rRNA sequences, of *Rhodosporidium* and *Rhodotorula* 435
penicillin-binding proteinn *Escherichia coli* . 163
peptidoglycan biosynthetic enzymes 179
pH control 369
Phaffia, partial rRNA sequences of 403
plasmid 351
plasmid R100 287
plasmid R100-1 279
plasmid transfer 279
pleurotus 69
Pleurotus cornucopiae 451
product inhibition on lactic acid fermentation 111
protoplasts 451
protozoans 143

[R]

radiation resistance 55
radiation sensitivity 55
replacement culture 369
restriction endonuclease *Aat*I, of *Acetobacter aceti* 273
restriction endonuclease *Apa*ORI, of *Acetobacter pasteurianus* 127
Rhizobium 81

Rhizobium meliloti 215
Rhodosporidium, partial rRNA sequences of 435
Rhodosporidium toruloides, partial sequences of 18S and 26S rRNAs of 63
rock phosphate-solubilization 81
rRNA sequences, of *Arxula*, *Stephanoascus* and *Yarrowia* 425
rRNA sequences, of *Phaffia*, *Cryptococcus* and *Filobasidiella* 403
rRNA sequences, of *Rhodosporidium* and *Rhodotorula* 435

[S]

salt effect 445
sewage sludge digesting thermophilic bacilli 189
similarity 69
specific measure for composting activity ... 189
spore cortex 333
Stephanoascus, partial rRNA sequences of. 425
stimulation of bacterial exopolymer production 345
storage of *Thiobacillus* 41
Streptomyces 377
structures of cell-wall polysaccharides 255
sulfite oxidation 41
sulfhydrylase 137
superoxide dismutase 235
survival 445
Syncechococcus elongatus 303

[T]

taxonomy 55
taxonomy of "*Proiaminobacter alboflavus*" 195
thermophile 303
thermophilic *Bacillus* 415
thermostable α-amylase 415
Thermus sp. 189
Thiobacillus ferrooxidans 283, 351
Thiobacillus novellus 41
Thiobacillus thiooxidans S3 ..... 41, 369
thiosulfate 369
torR mutation 357
transconjugant growth rate 279
trimethylamine *N*-oxide reductase 357

[U]

UDP-N-acetylmuramyl pentapeptide synthetases 179

[V]

Vibrio parahaemolyticus 445

[X]

Xenorhabdus spp. 393

[Y]

Yarrowia, partial rRNA sequences of 425
yeast taxonomy 151
